Health

2018 ANNUAL REPORT

WELCOME

Owensboro Health exists
to **heal the sick** and to
improve the health of the
communities we serve.

To our readers,

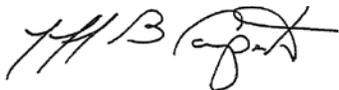

We're very pleased to share with you Owensboro Health's 2018 Annual Report. This comprehensive document takes a look at the happenings throughout the health system over the past year.

We're proud to share this report with you because it's more than just a simple update on the system's operations. As the largest employer in Kentucky west of Louisville, we're also a major economic engine for this region.

We are committed to honoring that trust with integrity and transparency. That is why we present this report to you as the latest chapter in the story of Owensboro Health. Within these pages, you will find a continuing narrative about our team, our system and our mission to heal the sick and to improve the health of the communities we serve.

We're excited to share with you the ways our work is making a difference, and we are always grateful for the privilege we have to serve this community. Thank you for giving us the opportunity to care for you and your loved ones.

Respectfully and appreciatively,

Jeff Carpenter, Chair
Owensboro Health Board of Directors

Greg R. Strahan, MHA
Owensboro Health President & CEO

OWENSBORO HEALTH'S STRATEGIC FRAMEWORK:

PATIENT-CENTERED CARE

For Owensboro Health the heartbeat of our health system is our patient. We consider it a privilege to be entrusted to care for every individual that we serve. It is why we work to ensure the care we provide is high-quality, safe, accessible and cost-effective. We believe that putting our patient at the center of everything we do creates a better experience for them and their families.

Quality & Safety

Quality and Safety are imperative in any healthcare system which is why Owensboro Health implemented tools like Target Zero, which is designed to improve patient safety. These tools give clinical staff a means to address concerns and make changes to processes in a way that is best for the patient. This attention to detail allows for greater cohesiveness within the organization, empowering team members, and resulting in a better patient experience.

Access & Cost

Access and Cost keep Owensboro Health competitive by addressing the direct needs of our communities. Just this year we improved accessibility in our communities by building three Healthplex facilities in Henderson, Hopkins and Muhlenberg counties providing greater access to primary care providers as well as specialists. It is this kind of forward-thinking that will propel us to the future and provide the consumer what they want most, reduced healthcare cost and easier access to care.

Engagement

Engagement is about working with our team, our communities and our providers. We want every person who interacts with Owensboro Health to know that we value what they say, what they do, and that they are the driving force in every decision that we make. In the last two years we have surveyed our team members and physicians and adjusted our strategy to meet those needs. As a result, our employee engagement and satisfaction rates have increased steadily and we know that leads to a better patient experience as well. While our patients benefit from quality healthcare, we have a responsibility to serve our entire community. The Owensboro Health grant-funded programs are an example of how we give back by addressing health concerns identified in the Community Health Needs Assessment. Our team members also address community needs by giving of their own time and resources to help make a better community for all of us.

Growth

Growth is a by-product of providing excellent quality, safety, increased access, decreased cost and team members who are engaged by actively listening to our patients. As long as our patients come first, growth will continue. We put our patients first when we constructed three Healthplex facilities, expanded our NICU services to keep families close to home for critical infant care, and recruited new doctors and specialists to practice in our area.

Owensboro Health's strategic framework makes it clear that our future depends on the experience of our patients, and the engagement of our team members, providers and our community. The patient experience has to measure up to the expectations of consumers that live in a world where they have options. We want our patients to leave all of our facilities saying they received EXCELLENT care that was affordable.

Owensboro Health's mission is to heal the sick and to improve the health of the communities we serve. The best way we can do that is to deliver the safest, highest-quality healthcare possible. When patients come to us, they are entrusting us with their most valuable possessions: Their health and their lives. That is why quality and safety must come first in all that we do.

The following items comprise a short list of some of our most noteworthy accomplishments in quality and safety during the 2017-2018 fiscal year:

- Sepsis awareness communicated with public and staff through various media channels in partnership with Sepsis Alliance. Sepsis is an extreme reaction to an infection that can be deadly if untreated.
- Owensboro Health Regional Hospital Neurosciences Unit reduced falls by nearly 60% through increased staff and patient communication and education efforts.
- Staff training simulations to increase awareness of patient concerns through collaboration with the Theatre Workshop of Owensboro where roles are reversed between actor and provider to emulate patient perception.
- Began using leadless pacemakers to reduce risk of complications and allow for minimally invasive procedures.
- Established Express Admit and Observation Unit to increase quality care by streamlining the flow of patients from the Emergency Department to admissions or discharge.

AWARDS AND RECOGNITIONS

Owensboro Health has been recognized for achievements in realms both clinical and non-clinical. This speaks to the dedication of our team members and their focus on excellence, one of the system's six core commitments.

Achievements in the past year include:

- Owensboro Health Regional Hospital: Recognized in August 2017 by U.S. News and World Report as one of the top hospitals in Kentucky. Also earned "high-performing" rating in areas of heart failure, knee replacement and hip replacement.
- Owensboro Health Regional Hospital: The American Society for Health Care Engineering's Energy to Care Award. This award was earned with major progress in energy efficiency, which was achieved by the health system's Facilities department.
- Owensboro Health Muhlenberg Community Hospital Emergency Medical Services: 2017 Mission: Lifeline Bronze® Award, presented by the American Heart Association.
- Owensboro Health Regional Hospital: Three units, Joint Center, Ambulatory Infusion and Progressive Care, earned the Five Star Excellence Award from Professional Research Consultants, Inc. PRC is the third-party organization which Owensboro Health partners to track and improve patient satisfaction.
- Owensboro Health Home Care: ABILITY Network, a national healthcare information technology company, awarded Owensboro Health Home Care the HomeCare Elite Award of Excellence in June 2017.
- Owensboro Health Medical Group: Owensboro Health's Multicare practice in Madisonville and one of its physicians, Dr. John Farmer, earned special community recognition in April 2018. Dr. Farmer was named Best Physician in the Readers' Choice Awards of The Messenger, Madisonville's primary newspaper. Multicare was also named the Best Medical Office in the Readers' Choice Awards.

Couple returns to OHRH to thank caregivers

Achievements continued:

- Owensboro Health Regional Hospital: The stroke program received its second consecutive zero-deficiency survey by The Joint Commission in August 2017.
- Owensboro Health Regional Hospital: Ortho-Medical Unit recognized for 242 days without a healthcare-acquired infection.
- Owensboro Health Regional Hospital: Kentucky designates OHRH as a Sexual Assault Nurse Examiner-Ready hospital. OHRH was the first hospital in Western Kentucky to earn this designation.

LEARNING AND EDUCATION

Owensboro Health is home to a number of education programs and efforts aimed at increasing the knowledge of our current team members and producing the next generation of healthcare professionals. Some of these programs and efforts include:

- **UofL partnership announced bringing medical resident physicians to Owensboro to practice family medicine at the Parrish campus.**
- **Grand Rounds educational events for nurses, physicians and other clinical staff. Events are taught and led by Owensboro Health providers and leaders or by special guests with advanced expertise in their field.**
- **Educational sessions focused on a variety of topics including: Older Adults and Aging, adverse reactions to medications, delirium, pediatric head trauma and more.**
- **Nationally accredited pharmacy residency program takes on two post-graduate year 1 pharmacists per year and gives them advanced training in various areas of pharmacy operations and clinical care.**
- **Medical laboratory scientists program gives advanced training to laboratory scientist students and is one of only two hospital-based laboratory scientist programs in Kentucky.**
- **Partnering with University of Pikeville Kentucky College of Osteopathic Medicine to host medical students as they work to become physicians.**
- **Apollo Adult Patient Simulator mannequin purchased in Summer 2018 thanks to a grant from the Dart Foundation. The simulator allows staff to practice on a life-like platform as the mannequin can simulate vital signs and physiological responses.**

Medical Laboratory

Apollo Adult Patient Simulator

Staffing Training Simulations

As a not-for-profit health system, Owensboro Health constantly reinvests in facilities, services and surrounding communities to increase affordability and access to quality care for the communities we serve. Some examples of fiscal responsibility and increased access are:

- *Addition of 3 new Healthplexes in Henderson, Hopkins and Muhlenberg counties that resulted in the addition of primary care and specialist services, on-site lab services, urgent care, occupational medicine and diagnostic radiology - including walk-in availability of x-rays, 3-D mammography, CT scans, bone density scans and ultrasound.*
- *Initiation of new cost savings programs through more effective contract monitoring and tracking of supplier costs.*

COMMUNITY HEALTH NEEDS ASSESSMENT

As a requirement of the Affordable Care Act (ACA), Owensboro Health Regional Hospital and Owensboro Health Muhlenberg Community Hospital - in conjunction with local county health departments and other community and state partners - are required to conduct and document a Community Health Needs Assessment, triennially. This assessment leads to the development and adoption of an implementation strategy to address the identified needs by guiding the region to an increased focus on issues that impact health, health outcomes and quality of life.

The most recent Community Health Needs Assessments identified the following as community priorities:

- Access to Care
- Oral health
- Obesity
- Youth health indicators (teen birth rate, obesity, lack of physical activities, lack of meaningful activities outside of school)
- Substance abuse, including tobacco
- Mental health

OWENSBORO HEALTH FOUNDATION

Owensboro Health Foundation is the philanthropic arm of Owensboro Health that partners with individuals, corporations, community organizations and other foundations to fund programs that serve people in the communities that make up our region. Last fiscal year, Owensboro Health Foundation funded programs that served 6,365 individuals. The following programs and services provided by Owensboro Health Foundation met the needs identified in the Community Health Needs Assessment:

- Apollo Nursing Simulator for medical training
- Baby Boxes for Infants in Need
- Bereavement Gowns for families grieving the loss of an infant
- Bike Helmets for children
- Breast Cancer Assistance Fund
- Camp Wheeze Away for children with asthma
- Car Seat Assistance Program for families in need
- Care Bears for Kids to comfort pediatric patients
- Dr. Scott E. Gaines Scholarship Fund for students from Hopkins County
- Fall Proof Program, fall prevention program
- Healthpark Run for Your Life, Kids' Fun Run
- HOPE Fund, "Helping Our People in Emergencies," provides support to OH team members facing crisis and emergency situations
- Lifeline monitoring devices for elderly
- LifeSpring, for anyone affected by a cancer diagnosis
- Mammograms for Life, free breast health services to medically underserved women
- Mitchell Memorial Cancer Center Medication and Transportation Funds
- Patient Assistance Program
- Hospitality Suites at OHRH
- Parkinson's Disease Support Group
- NICU at Owensboro Health Regional Hospital
 - » Developmental Therapy Program
 - » Monitors, equipping two additional rooms in the NICU with specialized equipment
 - » NicView™ secure web-based video stream of infants in NICU
 - » Portable Amplitude-Integrated EEG Monitor, monitoring of brain function of preterm babies
 - » Shuttle, allows more persistent thermoregulation
 - » Kangaroo Care Chairs, specifically designed to promote this skin-to-skin experience for preterm babies
- Oncology Conference for medical professionals on predominant cancers in our area
- Pediatric Emergency Education for medical staff
- Pediatric Phototherapy Equipment for infants admitted to the hospital for elevated bilirubin levels
- Pediatric Transportation Assistance for low-income families of pediatric patients
- Stop-the-Bleed Kits
- Vicki M. Stogsdill Nursing Award for students completing a Bachelor of Science degree in nursing (BSN) through the University of Louisville School of Nursing-Owensboro

ENGAGEMENT

The Owensboro Health system strives to address and meet the needs of the communities we serve through outreach efforts, community engagement and partnership. Employees also give of their time and resources outside the organization. Our mission is to heal the sick and to improve the health of the communities we serve and we recognize that goal must be achieved within our walls and outside of them. Engagement takes us where the needs exist – to the heart of vulnerable communities – where we can reach those who face barriers to achieving good health.

Listed below are community partnerships that impact local health:

- School health programs, such as athletic trainers, nursing support and health education.
- The Owensboro Healthpark's annual Run for Your Life event includes a 5K, 10K and Owensboro Health Foundation-sponsored Kid's Fun Run along with live music, events, games and bike giveaways.
- Food+Art+Health began as a state-wide gathering hosted at Owensboro Health and developed into a program designed to show how these areas intersect to create vibrant, healthy communities. A signature event at Owensboro Regional Farmers' Market brought local food, art and health agencies together.
- Over \$1 million given to community nonprofit health and arts organizations in the region, in a fiscal year.
- Discussion panels host experts on a variety of topics related to local health concerns ranging from black lung to breast cancer.
- Owensboro Regional Farmers' Market makes healthy food more accessible to community members by hosting local farmers and vendors in a beautiful new pavilion built on space provided by Owensboro Health and at Owensboro Health Regional Hospital.
- Combatting hunger and food insecurity by partnering with local food banks to feed communities and partnering with Senior Community Center of Owensboro-Daviess County (formerly the Munday Activity Center) to feed seniors in need.
- "The Doc is In" and "Walk with a Doc" series invite the community to free educational sessions at the Healthpark, where they can learn about a variety of health topics. The sessions provide resources for those attending and are led by providers and other topical experts.
- Sponsorship of community events, including health projects, sporting events and concerts.
- Arts in Healing signature series featured local artists at Owensboro Health Regional Hospital.

Run for Your Life

Food + Art + Health

Food + Art + Health

Arts in Healing - Signature Series

In addition to healthcare, community wellness and other medically oriented services, Owensboro Health also supports the most vulnerable areas of our communities at several points throughout the year. These efforts are just a few more ways that Owensboro Health and our team members care far beyond our hospital, clinic and office walls.

COMMUNITY HEALTH INVESTMENTS GRANTS

Each year, Owensboro Health awards its Community Health Investments grants. These grants are awarded to nonprofit health, human services and arts organizations throughout the Owensboro Health service area.

Funds are awarded to projects that focus on identified community health needs or Owensboro Health’s priority focus areas, including: Older Adults and Aging, Arts in Healing, Tobacco and other Related Diseases, and Children and School Health. Since 2009, Owensboro Health has awarded more than \$6.1 million through this grant program.

OWENSBORO HEALTH GIVES BACK TO THE COMMUNITIES IT SERVES

Every fall, Owensboro Health challenges its team members to support charities and organizations that make a difference in our communities and region. The Owensboro Health GIVES campaign makes it easy for team members to give, with payroll deduction options matched by OH at 50% along with other activities. The system also raises thousands of dollars for charitable organizations through a system-wide silent auction.

MAKING SURE THERE’S ENOUGH TO FEED THE NEED

Sometimes caring for those in need can be as simple as helping put food on the table. While it’s a simple form of giving, it makes all the difference for the people who would otherwise go hungry.

Owensboro Health’s annual food drive generates tons of food and thousands of dollars for food banks in Daviess, Hopkins and Muhlenberg counties. For the Help Office in Owensboro, this food drive generates about 45% of the food they distribute throughout the entire year. Cash donations and t-shirt sale proceeds are also given to help purchase perishable food, and to help individuals who need assistance with rent, utilities and other critical expenses.

Arts in Healing - Owensboro Dance Theatre

Owensboro Health believes in growth through the delivery of quality patient care and community service. Everything we do is focused on an improved patient experience whether it be access to specialty doctors and treatments or new facilities to better serve our communities.

Through the addition of the new Healthplex facilities located in Henderson, Hopkins and Muhlenberg counties, we were able to expand services and bring new providers and specialists closer to our patients.

In addition to the Healthplexes, Owensboro Health added many providers to our team, resulting in the expansion of services and capabilities closer to home. Greater access within our communities means patients no longer need to leave the area for care.

Dr. Ravi Alapati, a fellowship-trained bariatric and general surgeon, is one of those new providers. Dr. Alapati is helping to address the obesity issue identified in our Community Health Needs Assessment through the new Owensboro Health Surgical Weight Loss Center located in the Ford Medical Building adjacent to the Healthpark.

UNIVERSITY OF LOUISVILLE

Owensboro Health recently announced a new partnership with the University of Louisville, to bring a family medicine residency program to the area. Medical residents, who are recently graduated doctors completing required post-graduate clinical experience, will begin practicing in 2020. With six residents per class, there will be a total of 18 new providers by 2023.

Owensboro Health is also making major strides in cancer treatment. This year we partnered with the University of Kentucky Markey Cancer Center, one of 70 National Cancer Institute-designated cancer centers in the nation, by joining Markey's Research and Affiliate networks. This membership enables Owensboro Health to expand access to treatments for our patients, including the addition of clinical trials.

Owensboro Health also recently acquired the TrueBeam™ linear accelerator to further enhance the radiation therapy options available to our patients.

ACCESS MEANS AFFORDABILITY

Owensboro Health is a not-for-profit health system. We see every dollar as a tool that can help us achieve our mission and make a difference in the health and well-being of the people we serve. For care to be accessible, people must be able to afford it, not just find a physical location where it is available. We will always seek to provide outstanding quality care at a reasonable price and to reinvest in ways that enhance the care we provide in the future.

CONSOLIDATED FINANCIAL STATEMENTS

OWENSBORO HEALTH BOARD OF DIRECTORS

The Owensboro Health Board of Directors consists of 14 volunteer members, including four appointees from the community, selected by nominations from local organizations. Additional representation is provided by three physicians, nominated by the hospital's medical staff, along with seven directors appointed by city and county government, one of whom is also a physician.
