Total	389

Measuring your progress:

Medicare Functional Quality Measures is a set of skills that are assessed for everyone that is a patient in an inpatient rehabilitation center. They include things related to self-care like bathing, dressing, and eating. They also include things related to mobility like moving around in bed, standing up, moving to a chair or commode, walking or using a wheelchair, picking up something from the floor, climbing a curb or a set of stairs. These skills are tested in your first few days and in your last few days to measure your progress.

Coding Scale

- 06 – Independent
- 05 – Setup or clean-up assistance
- 04 – Supervision or touching assistance
- 03 – Partial/moderate assistance
- 02 – Substantial/maximal assistance
- 01 – Dependent

Patients Treated	Average Age	Average LOS (days)	Average # Therapy Hours per day	Discharge Home/Community
389	68	13	3.2	85.1%

Patient Experience FY22
