Purpose

The Patient Protection and Affordable Care Act of 2010 requires nonprofit, tax-exempt hospitals such as Twin Lakes Regional Medical Center (TLRMC) to assess the healthcare needs of their communities every three years and to adopt an implementation strategy to address the needs identified. Each hospital must make its Community Health Needs Assessment (CHNA) and Implementation Strategy widely available to the public. This is the current CHNA and Implementation Strategy for Twin Lakes Regional Medical Center.

TLRMC is dedicated to strengthening the health of the people we serve. In the past, TLRMC has employed a mixture of different methods and intuition to assess the health needs of our communities. Hospital leadership, outside healthcare consultants, physicians, Board of Directors and others then adjusted services to meet those identified needs. Assessing community health needs through a review of available health data and discussion with area health care partners, community leaders and representatives of the many groups served by the hospital give TLRMC and its healthcare partners the opportunity to identify and address the area's most pressing health care needs.

About Us/Service Area

Twin Lakes Regional Medical Center, in Grayson County, Kentucky, is a 75-bed regional hospital providing inpatient and outpatient services to the residents of a six-county area with a population of more than 90,000. In 1951, concerned citizens made a commitment to serve the medical needs of the community by building the 14,000-square-foot Grayson County War Memorial Hospital. Located near the original facility, TLRMC has grown to almost 300,000 square feet, is now one of the region's largest employers, and has come to be recognized as a regional health care provider.

The mission of Twin Lakes Regional Medical Center is that we exist to heal the sick, relieve pain and suffering, and improve the quality of life for the people we serve. It is our vision to be recognized by the people it serves as the provider of choice for their health care needs and as a leading force for progressive change within our community.

The primary service area for Twin Lakes Regional Medical Center consists of Grayson County including the city of Leitchfield (population 6,749 July/2011). The secondary service area includes, but is not limited to, Breckinridge, Ohio, Butler, Edmonson, Hart and Hardin counties in Kentucky.

For the purpose of this report, all references to "service area" are intended to mean Grayson County and the communities within the county.

Community Profile

Key demographic information – Grayson County, KY and Kentucky

July 1, 2014 estimates unless otherwise noted

	<u>Grayson County</u>	<u>Kentucky</u>	<u>USA</u>
Population	26,194	4,413,457	
Persons under 5 years, percent	6.3%	6.3%	
Persons under 18 years, percent	23.8%	22. 9 %	
Persons 65 years and over	16.2%	14.8%	
High school graduate or higher, persons 25+	75.1%	83.5%	
Bachelor's degree or higher, persons 25+	9.1%	21.8%	
Per capita income	\$17,587	\$22,515	\$27,04I
Median household income	\$33,091	\$41,576	\$51,425
Persons in poverty	25.1%	19.1%	
Persons per square mile (2010)	51.8	109.9

According to *County Health Rankings 2015*, Grayson County is ranked **79th out of 120** counties in Kentucky for Health Outcomes. Health Factors are a variety of statistics used to indentify what influences the health of a county. **This is a drop from 77th in 2013**.

<u>Health Factors include</u> Tobacco use Sexual activity Quality of care Income/Children in poverty Environmental quality

Diet and exercise Teen birth rate Education levels Family & social support Number of fast food facilities Alcohol use Access to care Employment statistics Community safety Recreation

Kentucky Health Facts.org is sponsored by the Foundation for a Healthy Kentucky with the aim of providing ready access to key health data for Kentucky communities. Their hope is that communities will use this data to identify local needs, to motivate change, to guide planning efforts, and to take meaningful, positive action toward improved health.

Healthcare resources within the community

- Twin Lakes Regional Medical Center
- Physicians full time general practice and specialists and visiting specialists
- Dentists and optometrists
- Quick Care urgent medical clinic
- Big Clifty Medical Center
- Caneyville Family Practice
- Grayson County Health Department

Methodology of CHNA for Twin Lakes Regional Medical Center

In conducting the CHNA, non-profit hospitals such as Twin Lakes Regional Medical Center are required to take into account input from persons who represent the broad interests of the community served.

TLRMC developed a survey to gather health information and opinions of Grayson County residents 18 and over. The survey was conducted in September and October, 2015 using an on-line survey tool and by distributing printed copies in various locations throughout the community. Registration clerks at the hospital handed out the survey to patients and family members. The on-line survey was promoted through newspaper advertisements, business cards and on the TLRMC Facebook page. Emails with a link to the survey were sent to Grayson County Chamber of Commerce members, local industries, and employees of the Grayson County school system and the hospital. Printed copies were delivered to an assisted living facility, the Grayson County Health Department, Big Clifty Medical Complex and the Caneyville Family Practice.

Information gaps that limited the ability of TLRMC to assess the community's health needs were identified. The primary obstacle was reaching elderly, low-income and/or rural residents due to a lack of internet access and willingness to participate. TLRMC made efforts to reach these individuals with written surveys.

757 Grayson County residents participated in the survey. The questions were in three primary categories:

- Demographics
- Personal health information
- Perceived health needs of the community

Survey questions and answers

What is your gender?

How many people currently live in your household?

What is your household income?

Was there a time in the past 12 months when you needed to see an eye doctor but could not because of the cost?

About how long has it been since you last visited a dentist?

Was there a time in the past 12 months when you needed to see a dentist but could not because of the cost?

How would you rate the overall quality of care provided at Twin Lakes Regional Medical Center?

In the past 12 months if you used another hospital other than Twin Lakes Regional Medical Center, what was the reason?

Are you able to visit a doctor when needed?

If you answered "no" above, please choose all that apply

Where do you go for routine healthcare? (choose all that apply)

During the past 12 months, how many times have you sought care at a hospital emergency room?

Does your doctor give you easy to understand instructions about how long to take care of your health?

Are you currently taking medication to help control your high blood pressure?

About how long has it been since you last had your blood cholesterol checked by a health professional?

How many times do you eat fast food per week?

If you are a male over the age of 40, about how long has it been since you last had a prostate cancer screening?

If you are a female over the age of 40, about how long has it been since your last mammogram?

If you are over the age of 50, about how long has it been since you had your last colonoscopy?

If you needed mental health treatment or counseling within the past 12 months but did not get it, what was the reason?

In the following list, what behaviors have you or your family experienced in the past 12 months? (Check all that apply.)

What do you think are the top 3 health problems facing our community? (Choose only 3.)

What can Twin Lakes Regional Medical Center do to better meet the healthcare needs of our community? (Open ended question)

2012

- Need more doctors/can't get appointment (32)
- Lower the cost (16)
- Improve ER quality/wait times (16)
- Need more public education (13)
- Be nicer, show more concern and respect (9)
- Give more free care to poor people (8)
- Quick Care needs to be open more (8)
- Psychiatry (6)
- Better doctors (6)
- Build a fitness center/indoor pool (5)

<u>2015</u>

- Need more doctors/can't get appointment (79)
- Lower the cost (23)
- Improve ER quality/wait times (22)
- Better doctors (19)
- More public health education (15)
- Build a fitness center/indoor pool (9)

Community Forum/ Focus Group

The Twin Lakes Regional Medical Center's CHNA team tabulated the results from the surveys (on-line and printed) and supplemented them with health statistics and demographic information. (See pages 7 – 19.) TLRMC then invited representatives from a variety of backgrounds to a Community Forum/Focus Group on February 2, 2016 to review the survey results and provide recommendations for the hospital's community benefit focus.

Professions represented

- Physicians
- School administrators, teachers and staff
- Health Department
- Dietician
- Industry/Manufacturing
- Optometrist
- Hospital Board members
- Law enforcement
- Hospital leadership

The purpose of the meeting was to

- 1. Present the findings of the survey, health statistics and demographic information
- 2. Get input from the group in identifying the top health issues facing Grayson County
- 3. Get the group's recommendation on the core health issues for the hospital's community health focus for the next three years

Once the information was presented a group discussion was held. Attendees were asked for their top health priorities without concern about the practicality of the hospital's ability to impact the issues.

Top priorities (in alphabetical order)

- Access to care
- Drug abuse
- Information/awareness of health issues
- Lack of physical activity options
- Mental health/suicide
- Nutrition
- Obesity

These results were then presented to the Population Health Committee for their consideration and input. (See page 22.)

Population Health Committee

To put the 2012 CHNA report into action, Twin Lakes Regional Medical Center created the Population Health Committee. This group of people works on improving the health of our community guided by the Community Health Focus Points set in the 2012 CHNA. The Population Health Committee is made up of hospital employees, industrial leaders, the Grayson County Schools superintendent, registered dieticians, a pharmacist, a representative from the Kentucky Cancer Program and a representative from the Grayson County Health Department. The Twin Lakes Regional Medical Center CEO chairs the committee. The Population Health Committee meets monthly to discuss and implement plans on improving the health of the community.

On Friday, March 4, 2016, the Population Health Committee met to consider the input of the community focus group, the size and severity of the needs, available data, and the ability to have an impact as a hospital. The Committee made their recommendations of Community Health Focus Points to the hospital.

Community Health Focus Points

After carefully considering the results of the Community Health Survey, the most recent health and demographic information available, and input from the Community Forum/Focus Group and the Population Health Committee, the following needs were identified by hospital leadership as the community health focus points for Twin Lakes Regional Medical Center in 2016 – 2019.

- Smoking
- Information/awareness of health issues
- Lack of physical activity options
- Nutrition/obesity

Board Approval

The 2015 Community Health Needs Assessment was approved by the Board of Directors for Twin Lakes Regional Medical Center on Tuesday, March 15, 2016.

Next Steps

The publication of this report is another step to a healthier Grayson County. It is the intention of Twin Lakes Regional Medical Center that the contents of this report be used to inform Grayson County residents of what their fellow citizens think are the most important health issues in their community. Additionally, TLRMC hopes this report will serve as a foundation to build lasting relationships between Twin Lakes Regional Medical Center, community partners and residents of Grayson County.

This report serves as a stepping stone to future studies of community health concerns, the enhancement of health services offered to the community and the spark to create community partnerships that address the health needs of the community.

Twin Lakes Regional Medical Center recognizes that we do not have adequate resources to solve all problems identified. However, we do have the obligation and ability to be the change leader where possible. We view this plan as providing guidance around how we, along with other area organizations, groups and agencies, can collaborate to improve the health and medical care available to the people of our community.

In order to addressing the prioritized needs, TLRMC will engage key internal and community partners. Customized strategies have been developed and will be continued. The strategies include, but are not limited to, modifying polices, public and private; providing support, information and incentives; improving access; enhancing skills; and changing consequences. Follow-up surveys will measure the success of each initiative and provide the next areas of focus for the hospital.

To inform the public and partners of our goals and to increase awareness of our plan, Twin Lakes Regional Medical Center will publish the full CHNA report on the hospital's website (www.tlrmc.com), promote the report on social media channels such as Facebook and Twitter, and submit to local news media. Printed copies will be available for the public at the hospital as well.
