only those reported to ISDH. Numbers should
not be characterized as a comprehensive total.

Indiana COVID-19 Data Report

Below results are as of April 8, 2020, 11:59pm. Dashboard updated daily at 10AM.

COVID-19 Testing Site Orders

Name: _____

Date: _____ Time: _____

You need to return to your home and remain in isolation until a provider tells you that staying at home is no longer required. Stay home from work and school, and avoid all public places. Adhere to the social distancing guidelines recommended by the CDC and the Kentucky Department for Public Health. Follow the home isolation and household guidelines provided at the time of your screening.

24-Hour Coronavirus Hotline

For patients and community members with questions or possible symptoms.

Prevention

As an employer, you have a responsibility to help prevent the spread of COVID-19, but you may be wondering what you can actually do to protect your employees and stop the virus from spreading.

We have put together [this PDF with the current best practices](#) recommended by the CDC to prevent the spread of the virus in the workplace. Just click the link to download. This PDF includes additional guidance from the Green River District Health Department on how to prevent workplace exposure to COVID-19.

CDC Guidance

We have also gathered some guidance from the CDC on what it means to be exposed to the virus, along with the CDC's recommendations on what should happen as far as quarantine and isolation if an employee is determined to have been exposed to the COVID-19 virus.

[Download a PDF with the CDC's info](#). Their information can also be found at www.CDC.gov/coronavirus

OSHA Guidance

The Occupational Health and Safety Administration has also provided some information in terms of control and prevention of the COVID-19 virus.

[Download the PDF with guidance from OSHA](#)

1. How are you handling employees who present with symptoms other than fever, cough, and shortness of breath? For example, are you presuming employees who have lost their sense of taste/smell as positive?
2. Does anyone have any thermometers to share?
3. For Dr. Rhodes, would you provide guidance relative to employees who's temperature "is historically high" based on a note from their physician? What if this pattern of elevated temperature continues, what do you recommend?
